SUMMARY

A graduate of Information and Communication Technology (Honours) from Asia e University who is enthusiastic about creating attractive and user-centric interface designs. I have gained experience from several internships as a web designer and ui/ux designer, and will continue to develop myself in relevant fields.

With skills in prioritizing user experience, using design methods from research to testing, and developing websites that support information technology. I can complete my studies and use my skills for professional work.

I have big ambitions for achieving my goals. I also have the ability to learn new things, so I can work in a team or individually. I always have the principle of putting user and company needs first. I also always evaluate myself to be better in the future. With the abilities I have, I am sure I can contribute well.
